Homework # 6: Server-side Scripting using PHP, JSON, and Google Places API

The full description of the assignment can be found here:

http://cs-server.usc.edu:45678/hw/hw6/HW6_Description.pdf

Submission

You are required to submit your source code electronically to the csci571 account so that it can be graded by graders and compared to all other student's code via the MOSS code comparison tool. To submit your file electronically, enter the following command from your Unix prompt:

```
submit -user csci571 -tag hw6 myfile.php
```

where, myfile.php is the name of the **single file** you created for your homework.

You must link this homework to your class homework page so that the graders can go to your website and grade your homework.

Grading

Here are the grading guidelines:
