Homework # 3: Practice Writing HTML

The full description of the assignment can be found here:

http://cs-server.usc.edu:45678/hw/hw3/HW3_Description.pdf

To test your homework 3, view your web page using **Firefox 57** or later. Resize your browser window to a size **larger**than the PNG image and then see if you have used the correct font, color and size, and if the position of text is correct.

Nothing on the page should move when you resize the browser window. When you resize the browser window larger, the site should be centered. When you resize the browser windows smaller, the site should "clip". This will be demonstrated in class.

Submission

You are required to submit your source code electronically to the csci571 account so that it can be graded by graders and compared to all other student's code via the MOSS code comparison tool. To submit your file electronically, enter the following command from your Unix prompt:

```
submit -user csci571 -tag hw3 MYFILE
```

where, MYFILE is the name of the file you created for your homework. You can have multiple filenames separated by spaces, if you have more than 1 file to submit. e.g.

```
submit -user csci571 -tag hw3 file1.html file2.html
```

You must link this homework to your class homework page so that the graders can go to your website and grade your homework.

Grading

Here are the grading guidelines:
